

**MotoWash** self serve wash station

## Customer convenience.

MotoWash is a self-service wash system designed especially for, but not limited to, the needs of motorcyclists. The short, easy-to-operate washing lance and modified foam brush cleans even hard-to-reach areas with brilliant results. The high-pressure pump features adjustable pressure levels, ensuring gentle cleaning.

The Stainless Steel housing of the MotoWash contains all you need for the operation of up to 6 different wash programs, such as shampoo, wax, high pressure (fresh water & softened water) & foam brush, selected via the front panel with the possibility to switch between programs at any time. An LED display shows the money inserted & the remaining value, making it simple to use & convenient for the customer.

Additional features include a tyre pressure checker, an integrated drying fan that removes residual water effortlessly and a handy storage compartment that protects the helmet and clothes from dirt and spray water.

# Flexible self-serve technology.

## More wash programs.

- Stainless steel cabinet for up to six wash programs
- Integrated lance holder
- Integrated brush holder (optional)
- Frost protection circuit (optional)
- Optional payment possibilities:
  - transponder and code

## Benefits.

- Price-attractive, one bay solution with small footprint
- More turnover through additional programs, like osmosis or pre-wash (e.g. rim cleaner)

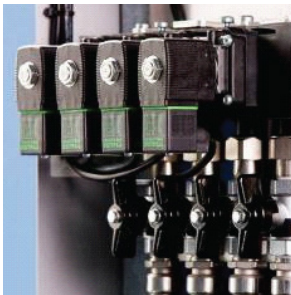

## Operating panel.

- One uniform operating panel for all machines
- Large LCD display shows wash credit and operating instructions
- Up to 6 programs with lighted indicators
- Touch operation with maintenance-free surface
- Optional stop function

## Benefits.

- No mechanical buttons
- Flexible payment options

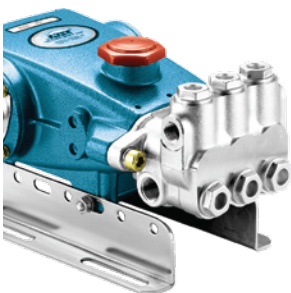

## Solenoid valves & dosing pumps.

- Solenoid valves in a chemical resistant plastic housing with stainless steel inner parts
- Integrated non-return and lock function
- Frequency-controlled, water-driven dosing pumps

## Benefits.

- Use of high-quality materials increases life time and reduces fault risk
- Ergonomic layout of water distribution makes easier accessibility
- Simpler dosing pump technology without electric drive and less moving parts

## High pressure pumps.

- High-pressure pumps in two versions:
  - Standard 2.2 kW (Annovi RCW)
  - Premium 2.2/ 4 kW (CAT 350)
- Frequency converter operation and high volume rate 14.8 l/min (optional)
- Chemical nickel-plated pump heads

## Benefits.

- Choice between standard and premium pumps
- Operation of high-pressure pumps at "low-speed" increases lifetime
- Ergonomic layout of pumps makes easier accessibility
