

Versa System self-serve technology

Quality, reliability, simplicity.

The Versa Direct Drive Stainless Steel System is the latest creation in reliable, simple, compact self serve car wash technology. The Versa easily meets the daily requirements for a multitude of different industrial washing applications and services.

Optional Low Pressure System

System overview.

- System will accommodate 1 - 2 bays
- 3 HP motors / 3 Phase 208/240V (System standard)
- 3 HP motors / 1 Phase 208/240V (Optional)
- 5 HP motors / 3 Phase 208/240V (Optional)
- CAT 5CP2140 High pressure direct drive pumps (3.5gpm @ 1200 psi) (System standard)
- Balanced pressure regulation control
- Cold Water rinse capability
- Preset pressure relief for high pressure pumps
- Hydrominder mixing for all chemicals and detergents
- Unit standard with High Pressure Soap, Rinse and Wax tank assemblies (system standard)
- Thermostatically controlled weep system (120VAC/1 Phase)
- Low water cutoff system protection
- GS-401 timer (optional)*

*Utilized in applications where meter box doors do not have time activation **Production specifications subject to change without notice

Wall Mount Low Pressure System

- Available in 1-4 function configurations
- Each LP function independently air driven
- Independent chemical and air solenoids
- Tanks assembled with industry standard 506 hydrominders for automatic mixing of all cleaning agents and solutions
- Thermostatically controlled foam brush changeover available. (120 VAC / 1 Phase)
