

SoftCare² Pro gantry car washes

**“How do I offer my customers
a unique car wash experience?”**

With a high-performance
system for the toughest of jobs.

“Who offers the solutions my customers expect from me?”

WashTec provides the answers for your business.

The car wash business has high demands, and no one knows this as well as WashTec. As the inventors of the gantry car wash, we revolutionised the car wash market – and have since led the way for more than 50 years, providing highly efficient washing technology, optimised chemicals and comprehensive services for your business.

Our approach is simple:

In everything we do, we not only focus on achieving the perfect result, we make the people we serve our top priority. Everyone expects to have a clean car after a wash. Results are important, but so is how we get there:

We understand your needs.

We listen carefully to what your customers say they want – and to your requirements as a business.

We meet – and exceed – expectations.

Our solutions are consistently geared towards your wishes and expectations, and they more than meet these.

We support your business.

We provide a car wash experience and finish that impresses your customers and earns their loyalty, giving you repeat business.

We improve your cost-efficiency.

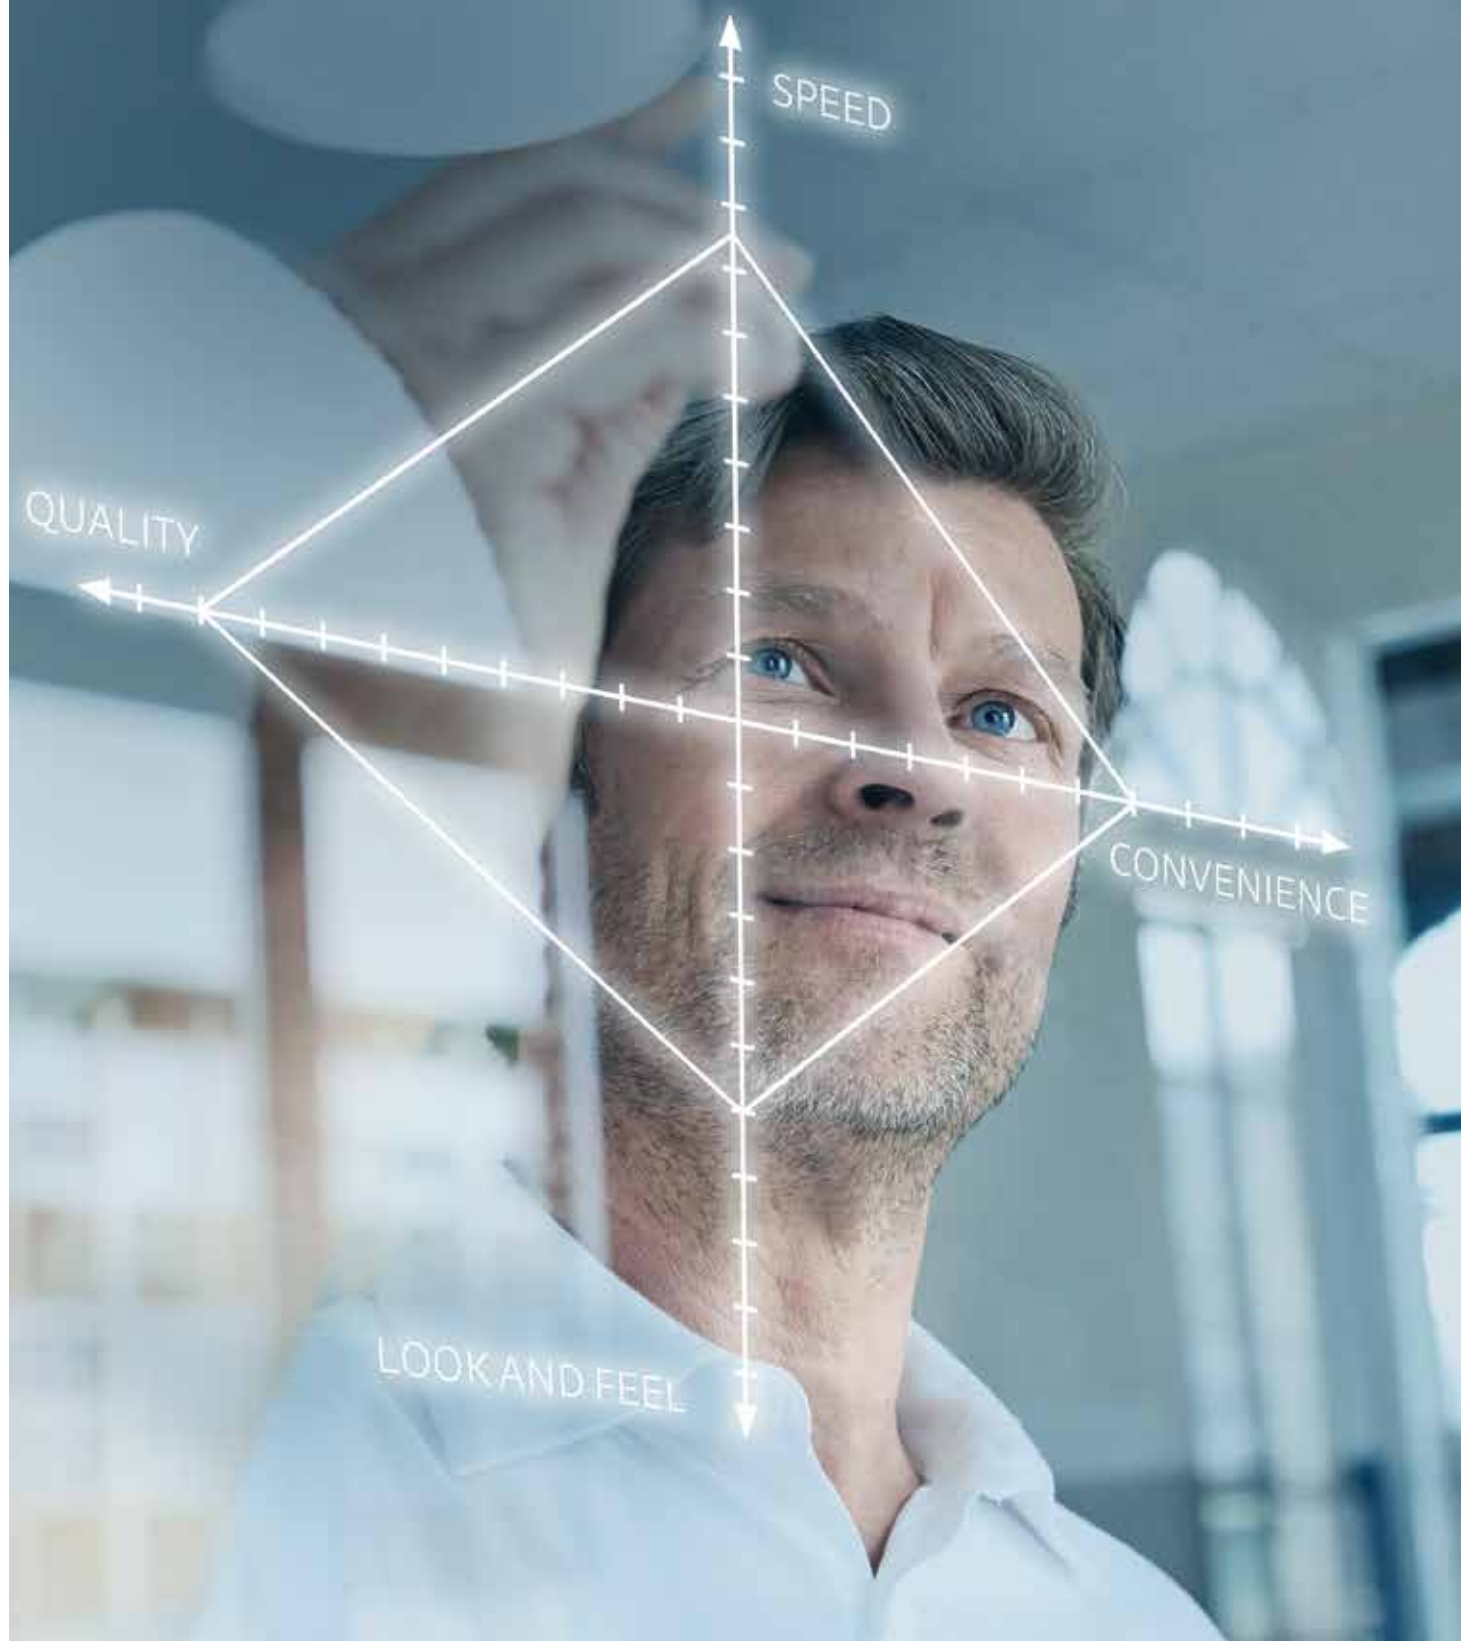

We offer robust, low-maintenance, durable technology and extremely efficient washing chemicals – for maximum profit at minimal cost.

SoftCare² Pro: Advantages for you and your customers.

- High potential turnover, because special functions justify higher prices.
- Satisfied customers, thanks to first-class car wash results and consideration of special requests.
- Flexible wash programme setup: with lots of available options and variable wash programme configurations, you can create tailored processes for any requirement.

“How can I get even more profit from my car wash business?”

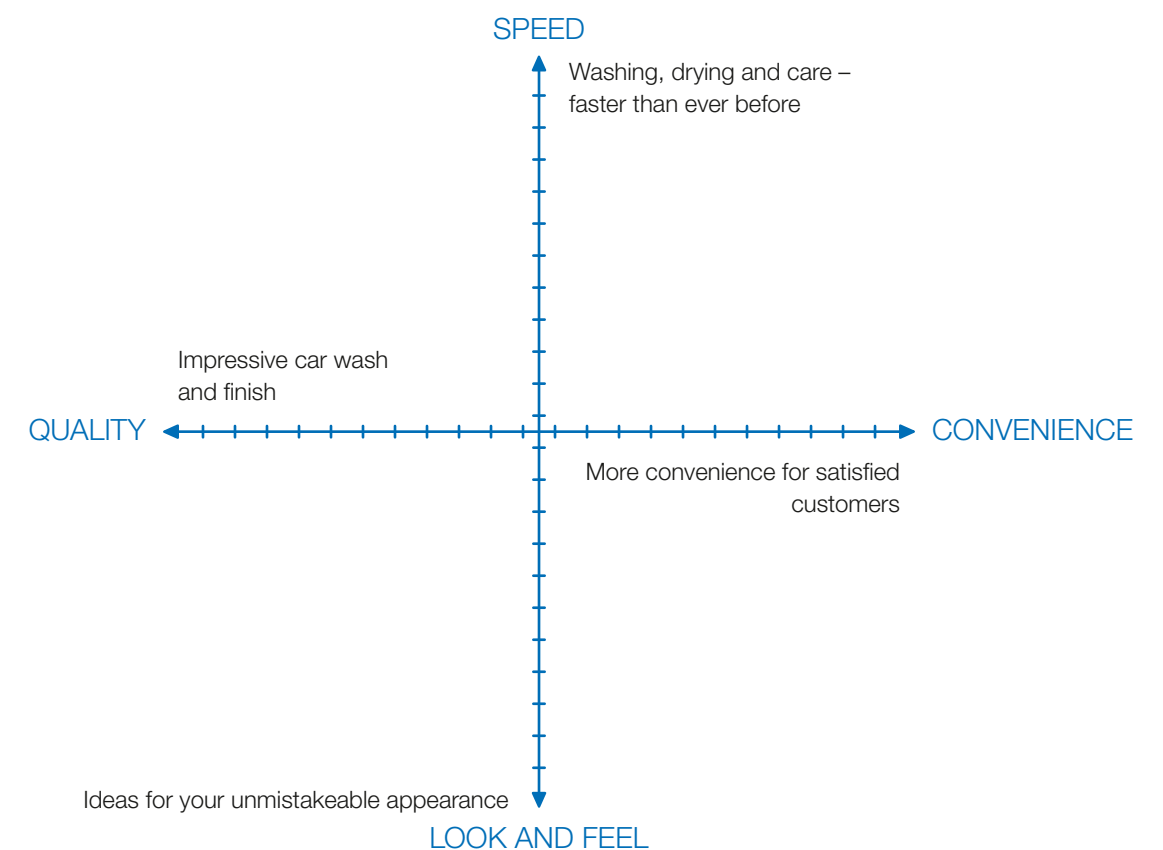

4DIMENSIONS for a successful car wash business.

A gantry car wash that provides a thorough clean in less than seven minutes – and is also easy to use and impresses customers with a fantastic car wash experience? Is there such a thing?

Indeed there is, because we invented it: the SoftCare² Pro. Like no other system, the SoftCare² Pro meets your customers’ high requirements for washing quality and speed, ease of use and design – the four parameters that we at WashTec call the **4DIMENSIONS** of the modern car wash.

The SoftCare² Pro gantry car wash combines all of these dimensions in one incredible car wash experience for your customers, and for your business as well, because it makes car washing a lucrative endeavour.

With 4DIMENSIONS, discover the new dimensions of car washing and use SoftCare² Pro to guarantee the greatest customer satisfaction and a successful car wash business.

4DIMENSIONS for every requirement.
 The 4DIMENSIONS make tailored solutions for every requirement possible. As a business, you decide which parameters are most important for you and we will guarantee you a solution that is optimally suited to your needs and your customers’ wishes.

“How can I achieve higher turnover?”

With a car wash finish that
exceeds all expectations.

Not all car washes are the same, and clean is not always clean: some differences are not spotted until problem zones like the tail and rims are inspected, or until the vehicle's paintwork starts to deteriorate in the long term.

SoftCare² Pro not only meets your customers' expectations, it exceeds them, with highly effective washing chemicals and technical features for a car wash finish that is sure to impress and that also sells at higher prices on average.

Best performance technology for optimal cleaning.

SofTecs® Pur:
Gentle and safe for paintwork and surfaces.
Developed from our successful SofTecs material, SofTecs® Pur is especially gentle and safe for paintwork and surfaces. Thanks to a higher rotational speed and longer contact with the vehicle, SofTecs® Pur achieves even more effective cleaning with improved results. The brushes are available in a variety of colours and colour combinations.

WheelFlash and WheelJet:
The solution for brilliant wheels.
Non-standard rims pose new challenges at the car wash. WheelFlash enables precise, complete application of the chemicals on the rims and ensures a brilliant shine for any design. The WheelJet washer can be trusted to clean both small and large rims: the diagonal arrangement means it always hits the centre and cleans even 21" rims.

MultiFlex:
Perfect cleaning for hatchbacks.
Hatchback slopes, rear spoilers and wheel arches are some areas that conventional side washers struggle to reach. Our solution is MultiFlex: this multi-dimensional side washer adapts flexibly to the rear slope of the car and even provides thorough cleaning under the spoiler and around the wheel arches. The result: a more brilliant finish for your customers and more turnover for you.

FlexStream:
Chemical application, washing and drying in one.
FlexStream is a multi-function rotating roof jet that takes care of chemical application, high-pressure washing and drying. Thanks to 360° rotation, it achieves highly effective results.

Touchless
version also
available

High-pressure options:
Powerful cleaning with high pressure.

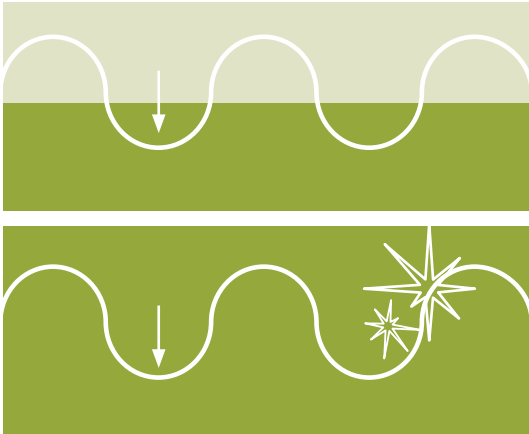

- SoftCare² Pro with high-pressure option: the maximum-effect TurboNozzles in this version ensure improved removal of coarse dirt in the front, rear and wheel arch areas.
- SoftCare² Pro Touchless: available as a completely touch-free version without brushes or as a ChoiceWash combination with high pressure and gentle brush wash.

Best performance chemicals for shine and protection.

Targeted application of chemicals:
For optimal effect in all areas
The best chemicals only work properly when their application is targeted. In the SoftCare² Pro system, the washing chemicals used always reach exactly where they are needed. The contour-tracking spray arm system and rotating FlexStream jet work close to the vehicle to guarantee economical and targeted use of the washing chemicals.

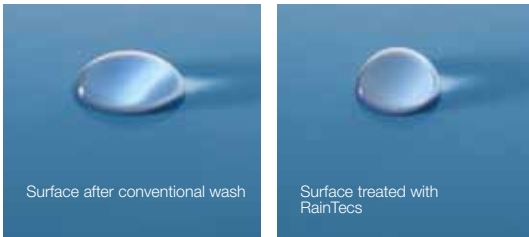

InsecTecs:
The effective solution for stubborn dirt.
A clear view throughout the year means safer driving. The highly concentrated InsecTecs insect remover is especially effective at eliminating stubborn dirt such as insect remains and bird excrement.

ShineTecs:
Shine and protect with a repair effect.
Offer your customers a brilliant foam polish with a unique 'repair effect'. With a patented Acrylionic formula, ShineTecs leaves a protective layer on the car's paintwork that intensifies with each wash and ensures a continuous shine and finish.

ShineTecs fills in small surface irregularities, while a permanent colour-neutral Acrylionic layer is left behind to protect the paintwork.

RainTecs:
The formula for maximal roll-off effect.
Drivers get twice the benefit from RainTecs care: the roll-off effect on the windscreen means significantly improved visibility in the rain, and RainTecs also protects the car's paintwork from harsh weather and environmental influences.

AUWA chemicals:
The success formula for your car wash business.

Washing chemicals from AUWA are the optimal complement to WashTec systems. As a full subsidiary of WashTec, AUWA has over 40 years of experience in the car wash business. Like no other provider, AUWA knows the needs of businesses and their customers and consistently gears its products and services towards these.

**“More washes in the
same amount of time –
is it possible?”**

**Innovative wash solutions create more
throughput and greater revenues.**

Time is money, even – and especially – in the car wash business. For one, your customers want to clean their cars quickly, and for another, as a business you know that the quicker the car wash, the greater your throughput and therefore your turnover.

The SoftCare² Pro gantry car wash offers you effective ways to increase your throughput. With extra-speedy express wash programmes, for example, your customers can get a brilliant finish in just a few minutes, making them – and you – happy.

Washing, drying and care – faster than ever before.

SoftCare² Takt

SoftCare² Takt: Wash and dry two vehicles simultaneously.

Whether at peak times or if customers are in a hurry, when cleaning needs to be fast, the SoftCare² Takt gantry car wash takes charge. Two gantries in separate zones for washing and drying take care of two vehicles at the same time and achieve a throughput of up to 20 cars per hour.

- The physical division of areas into washing and drying zones enables very high throughput.
- Washing: one roof jet and two side washers provide optimal cleaning along all vehicle contours.
- Drying: no water is used in the drying zone. As a result, the powerful roof and side dryers deliver the best drying possible.

SoftCare² Juno

SoftCare² Juno: The fastest gantry car wash means a successful business.

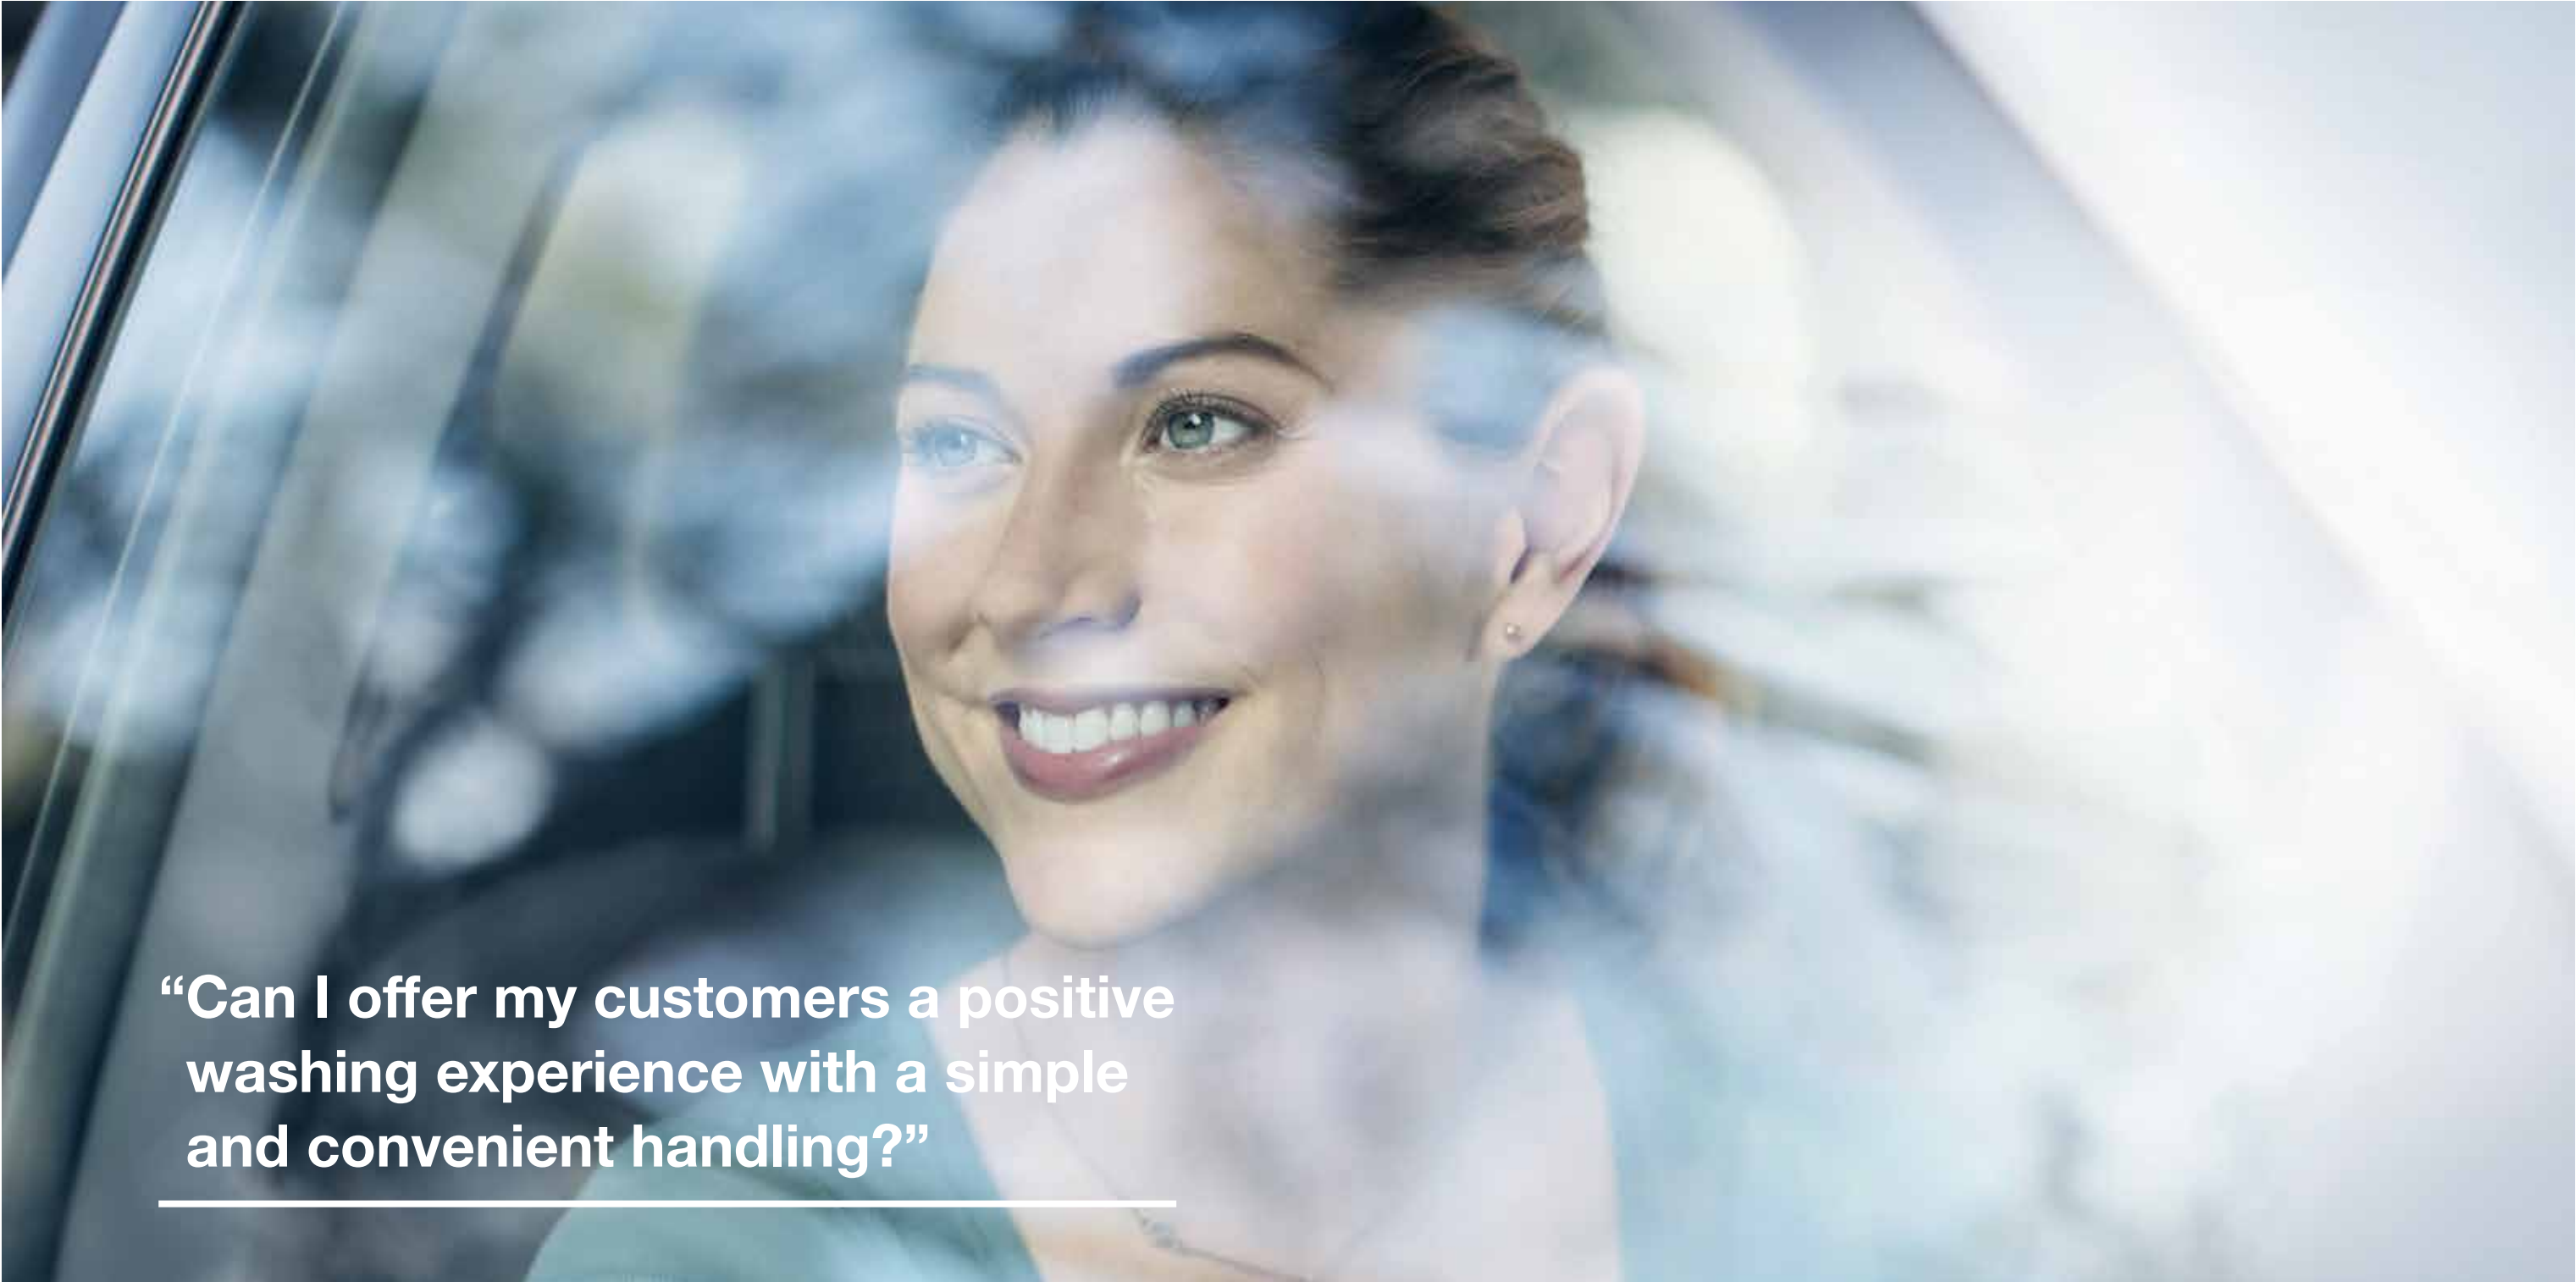

- Extremely fast washing thanks to an intelligent dual-gantry concept – for shorter washing and drying times
- Can be combined with virtually all SoftCare² Pro options and innovations
- Satisfied customers thanks to fast car wash and first-class results
- Maximum use of space in standard areas: the entire washing system only needs 9 metres of space in terms of length
- High potential turnover through profitable add-ons
- Second roof jet speeds up the washing process; second dryer speeds up the drying process

ShineTecs 2GO: washing and polishing in no time at all.
ShineTecs 2GO makes targeted use of the cleaning effect provided by the Acrylionic formula and combines effective deep cleaning with a unique repair effect and long-term protection. The entire car wash process, including cleaning, application of care products and drying takes place in a **sensational record time of just 5½ minutes**.

ShineTecs Express: the turnover boost.
Application of care products, polishing and rinsing in just one pass: with ShineTecs Express, you can offer your customers a clean and perfect finish in the shortest amount of time.

Fly-in: for quicker drying.
The system memorises the contour of the vehicle during washing (known as the memory contour), which speeds up the drying process: the dryer drops towards the car roof more quickly as the vehicle approaches. The result: a faster wash and satisfied customers.

“Can I offer my customers a positive washing experience with a simple and convenient handling?”

Smart solutions for easy operation and payment.

Car wash customers want a straightforward, easy process. They don't want to battle through a complicated operating and payment ordeal. They want convenience, combined with a high degree of individuality.

With the SoftCare² Pro, you can offer your customers convenience in a new dimension: from easy operation and payment to the Drive-In concept and a personalised car wash with iWash. Show your customers that you take their car wash experience seriously and they will continue to give you their custom.

More convenience for happy customers.

Drive-In car wash: more convenience, more safety, more turnover.

Buy a wash ticket, drive in, get the car cleaned and off you go: with the Drive-In car wash concept, your customers sit comfortably in their cars during the washing process.

BENEFITS FOR BUSINESSES AND THEIR CUSTOMERS:

More convenience:

Customers do not have to get out of the car and wait outside for their cars to finally be ready. Instead, they can stay in the comfort of the car and spend that time doing something useful. Available in the 'Sit', 'Stand' and 'Wall' versions to make it suitable for any location.

More safety:

There's no risk of slipping or tripping in the wet car wash area.

More turnover:

With customers staying in the car, the wait time between washes is shortened. This is especially useful at peak times, when you can wash more cars in less time and achieve greater profit as a result.

Retrofittable at any site!

Wash&Pay:

Wash first, pay later.

Drive in, get the car cleaned and pay – with Wash&Pay, getting the car washed is just like refuelling. The customer drives directly into a free gantry and can pay conveniently either during or after the car wash process, saving time and eliminating the need to get out and in unnecessarily.

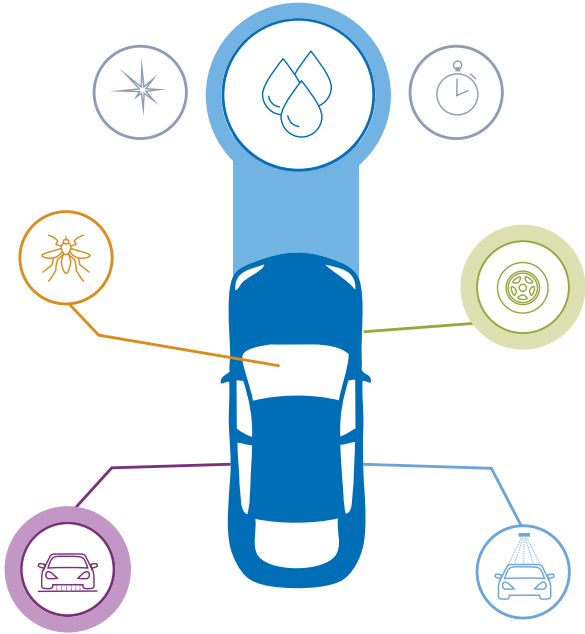

Touch operating terminal:

Convenient programme start.

The extra-convenient operating terminal: your customers can use the touchscreen for quick and easy selection of their car wash, payment and programme start, and can even do so right from the driver's seat if desired. They can use the selection function to choose for themselves whether they would like to get out of the car before the wash or remain inside.

iWash: a car wash that is more personalised than ever before.

With iWash, your customers configure their desired car wash themselves with ease. Whether they want 'Insect Intensive', 'Wheel Intensive', 'Underbody Wash' or additional special wax, selection is quick and easy on the Touch terminal. The price and end time of the car wash are displayed directly after selection for maximum transparency.

Advanced Chemical System (ACS): Convenient, fast and safe.

With ACS refilling chemicals is faster, cleaner and safer.

- More convenience: simple, straightforward cartridge replacement
- More quality: optimal dispensing is guaranteed as the system self-calibrates automatically and has a continuous self-monitoring and adjustment function
- More safety: safe handling of chemicals without spillage
- More time: cartridge replacement takes no more than two minutes

SoftCare² Pro XL:

Extra wide for an easy drive-in.

Wide saloons, SUVs, caravans and commercial vans can all fit comfortably in the SoftCare² Pro XL thanks to 2.58 metres of width, making it the perfect machine for vehicles with especially large dimensions.

Driving into the gantry is extremely easy – worrying about how wide the vehicle is and whether the wing mirrors will fit is a thing of the past.

“Do all car washes have to look the same?”

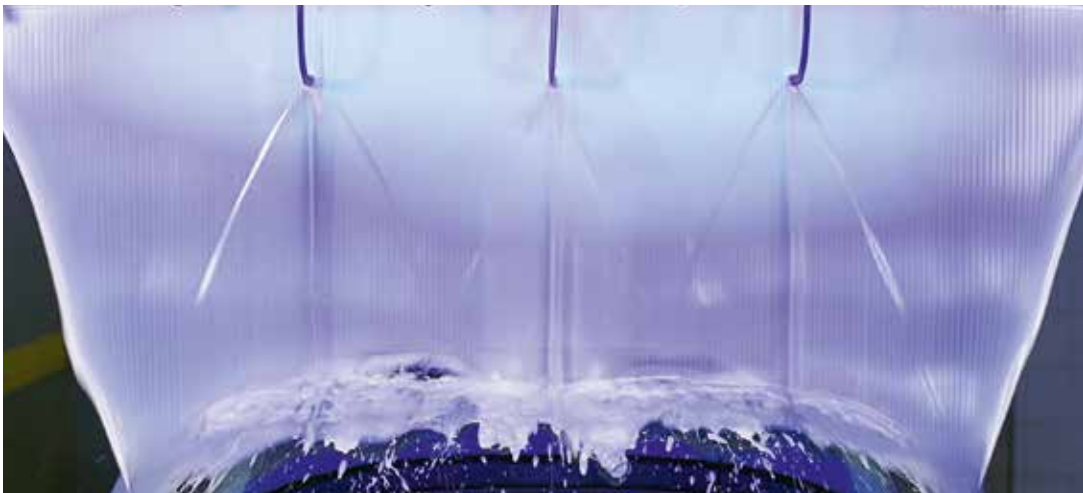

Design a more appealing car wash experience for your customers.

Customers know a special car wash when they see it – from the appealing look of the machine and modern design. SoftCare² Pro provides a visual experience that continues even during the wash programme – it will surprise both you and your customers. The great

thing about having a modern design is that not only does it look nice, it also pays off for you: experience has shown that customers are willing to pay higher prices for high-quality products and services that also look good.

Ideas for your unique appearance.

FoamSensation: A foam wash with a wow effect.

The optimal add-on for your existing foam pre-wash, FoamSensation covers the entire vehicle with a voluminous, colourfully lit curtain of foam, transforming the car wash into a spectacular experience. The attractive LED lighting in combination with perfume conveys freshness and cleanliness.

StarTrack guide rails: Attractive markers leading into the car wash gantry.

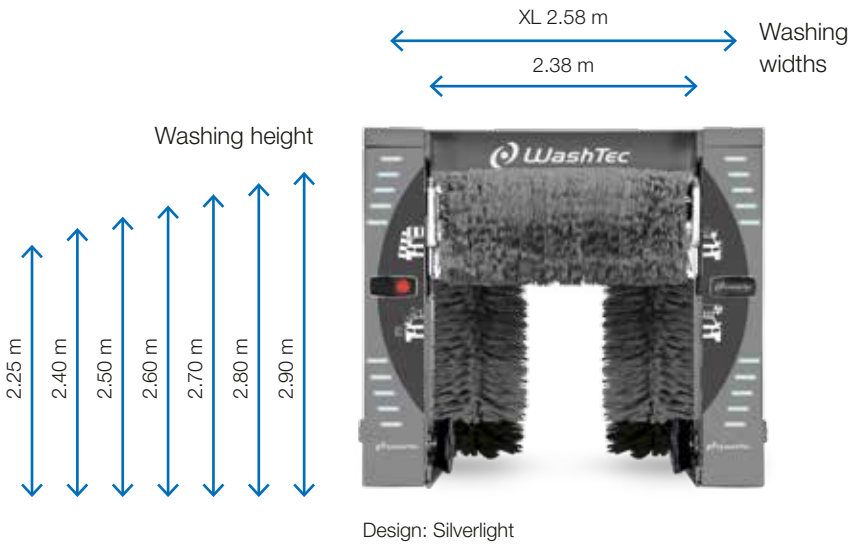

The innovative StarTrack guide rails light up to show your customers the way into the gantry. The variable lighting pattern and change of colour based on the process (drive-in, positioning, wash programme start) allow the customer to see immediately when the car is in the correct position, for example. In combination with FoamSensation, the LED lighting of the guide rails creates a unique lighting ambiance during the car wash process.

SoftCare² Pro designs: Premium at first glance.

There are a number of different design variants and lighting and display elements you can use to design your system. Select one of WashTec's appealing designs, individualise it with highlights from the creative Art Collection or adapt your system in colour and motif to suit your company's brand. Machines can be ordered in almost every RAL colour.

Perfect dimensions to maximise your business.

Adapt your SoftCare² Pro system to suit the height of your car wash area. You can choose from seven washing heights ranging from 2.25 m to 2.90 m – perfect dimensions for modern vehicles. In addition to the standard washing width of 2.38 m, there is also the XL frame width of 2.58 m available.

Equipment details.

The perfect complement to your car wash business

Take advantage of all of the possibilities available in the car wash business by offering your customer an extensive range of add-on services. Whether vacuum cleaners, floor mat cleaners, spray equipment or money-changing machines are involved, WashTec has lots of options for you.

High-pressure pre-wash: for an all-round clean

- Suitable designs for any configuration
- Swivel nozzles with different pressure levels from 16 to 85 bar
- Flat jets, swivel point jets and turbo jets available
- Built into the sides of the gantry frame and in the roof dryer for contour-controlled operation

Variety of brush materials.

- PE, SofTecs, SofTecs[®] Pur (textile upon request) in a number of colour combinations
- Suitable for your unique and clean appearance

Extra business for you with underbody washes.

- Underbody washing is a service in high demand, especially in winter and spring
- Economical operation thanks to segment control for targeted washing of short vehicles
- Ideal service for customers who want their car to retain its value with the best care possible

Efficient application of chemicals with external dispensing technology.

- Decentralised chemical supply and dispensing from the service room
- Large containers mean fewer refilling cycles
- Refill at any time without interrupting car wash operation
- Optimal access even in narrow car wash areas

Sparkling clean appearance for your car wash area.

- Spray equipment at the bottom of the machine rinses the floor of the car wash zone during the last wash programme pass
- Your car wash area is always clean
- The entrance for car wash customers is always clean

Accessories.

AquaPur:

An efficient and profitable water recovery system.

- The most efficient way to save money and protect the environment
- Virtually 100% of washing water is recovered
- Up to 600 washes per month possible without needing to add more chemicals

Pre-spray equipment:

Complete your clean service.

- Optimal finish thanks to perfect pre-washes
- Easy and targeted application by the customer
- Perfect for integration in the 'waiting zone' at the front of the car wash
- Ideal for additional turnover

Vacuum cleaner.

- Optimal for making use of 'empty space'
- Additional turnover boost
- Opportunity for customer retention strategies, such as inclusion as an upgrade service in promotions

Control and operation made easy.

Car wash customers want a straightforward, easy process, especially when it comes to operating your washing system. WashTec offers a number of operating terminals, available with a keypad or touchscreen. Select from various configurations and payment systems, such as those involving wash tickets, transponder cards or payment by credit card.

Maximum cost-efficiency: Control terminal standard.

- Wall-mounted terminal
- Start wash programmes with user-friendly code entry on the keypad
- MultiBox²: user-friendly code output for your office

Intuitive operation: Control terminal with code.

- Attractive terminal mounted on the wall or on a pedestal
- Easy code entry on the keypad
- MultiBox²: user-friendly code output for your office
- Individual operating mode with or without cable connection

Optimal combined solution: Control terminal with code + card.

- Combined solution that suits every situation – single wash using a code with registration
- Your customers can choose between 'Multi' and 'Cash' wash cards in the form of durable transponder cards that never expire
- MultiBox²: system-integrated code output and programming of transponder cards for easy, flexible handling

Elegant solution for extremely easy operation: Control terminal with code + scan.

- Easy system operation with wash tickets and scanner
- Your customers can choose between 'Single', 'Multi' and 'Cash' wash tickets
- MultiBox²: user-friendly code output for your office as a printout with a barcode

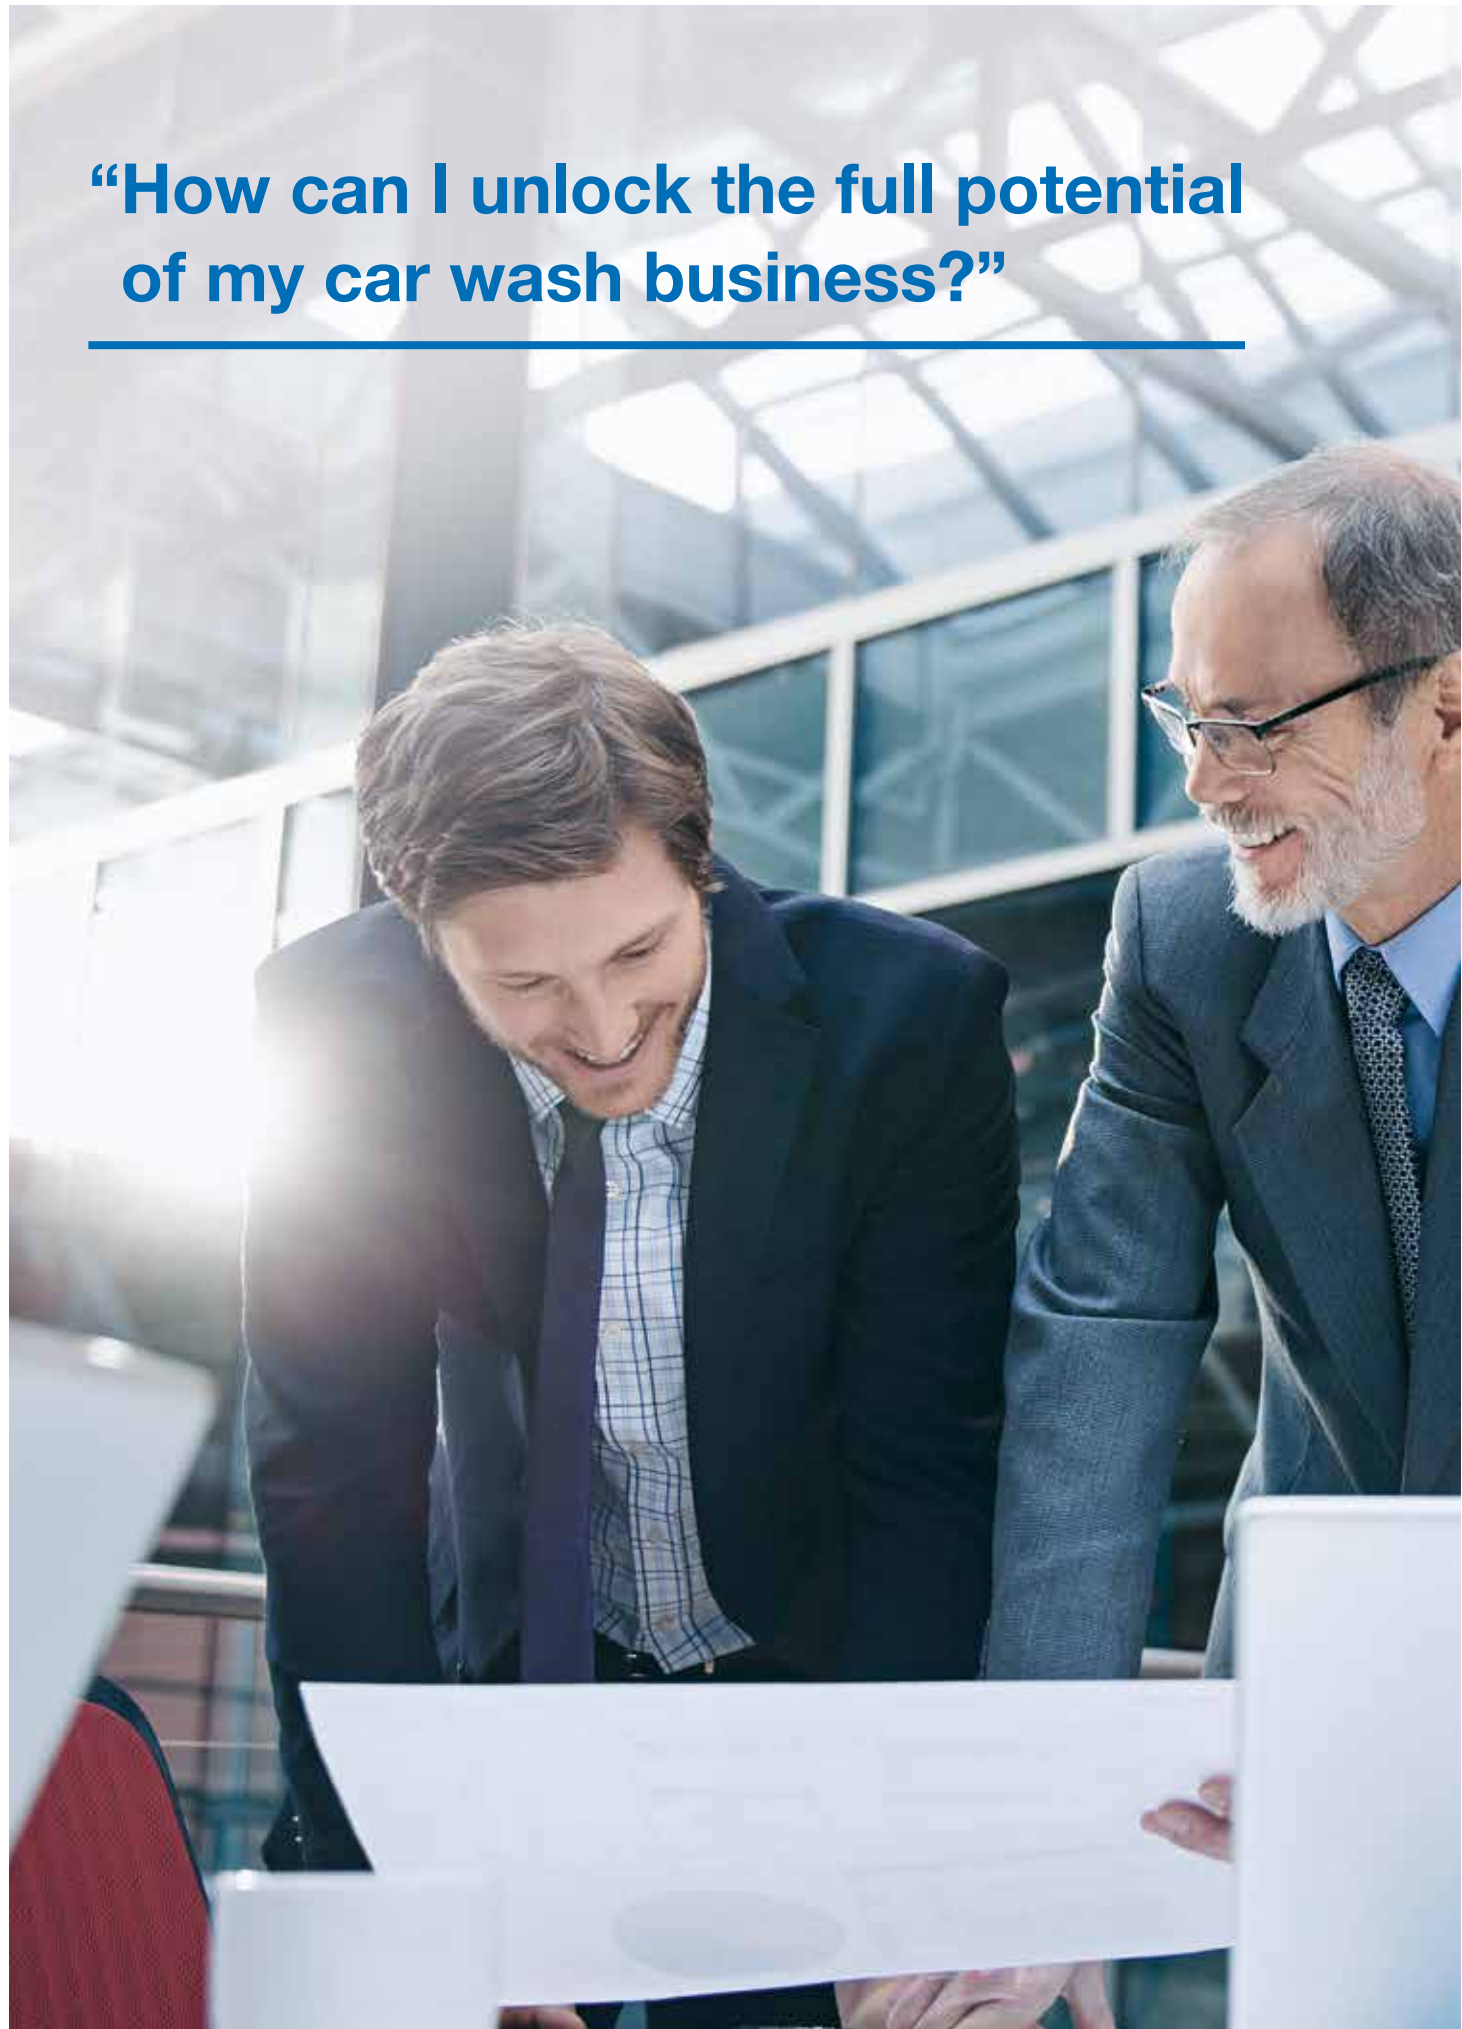

Convenient programme start: interactive with touch operation.

- Your customers can use the touchscreen for quick and easy selection of their car wash, payment and programme start
- Easy operation thanks to intuitive graphical user interface
- Innovative system – and a necessity for new concepts like iWash and Drive-In

Internet connection for the perfect overview.

- With WashTec Plus, you are in a great position to get perfect overviews and reporting as a multi-site operator
- Machine counters and ACS fill levels are easy to view and configure online
- Flexible access via smartphone, tablet and/or PC

“How can I unlock the full potential of my car wash business?”

With WashTec’s comprehensive service package.

The success of your car wash business is decided long before you open for business. WashTec supports you through the entire process, from initial planning and financing to running operation.

As a market leader in the car wash industry, we know what your successful business depends on and offer a comprehensive range of complete services from a single source. SoftCare² Pro not only provides an entirely new experience for your customers, but also for you.

» Competent planning: The basis for your successful business

Each car wash site is different, just as each car wash clientele has specific requirements. We help you to choose and configure the right SoftCare² Pro gantry car wash for you. If desired, we can also take on site planning and potential analysis, giving you a solid basis for a successful business.

» WashTec Marketing: Ideas for optimal success

A successful car wash business also needs powerful marketing. We can provide you with support in this area from day one onwards, from conducting site and target market analyses to developing a marketing concept just for you, supporting you as it is implemented and helping you to monitor its success afterwards. We offer a number of advertising media that can be used to attract new customers and appeal to existing customers. It’s very easy: simply order your advertising choice from the WashTec CarWash shop.

» WashTec Financial Services: Your go-to for finance

WashTec Financial Services is your first contact when it comes to financing your system. Whether you are interested in leasing or a hire-purchase scheme, we can provide individual advice and find the best solution for you with a contract that is precisely tailored to suit your needs. We also help you to draw up a profitability calculation and offer attractive terms and conditions.

» Maintenance and support: Service the way you need it

Downtime costs time and money. That’s why keeping your car wash in smooth running order is our top priority. Our maintenance concepts are tailored to your individual needs and ensure constant availability of your system. And if you do hit a snag, our service network has over 200 experienced employees that provide you with perfect support using state-of-the-art commercial vehicles and online management systems.

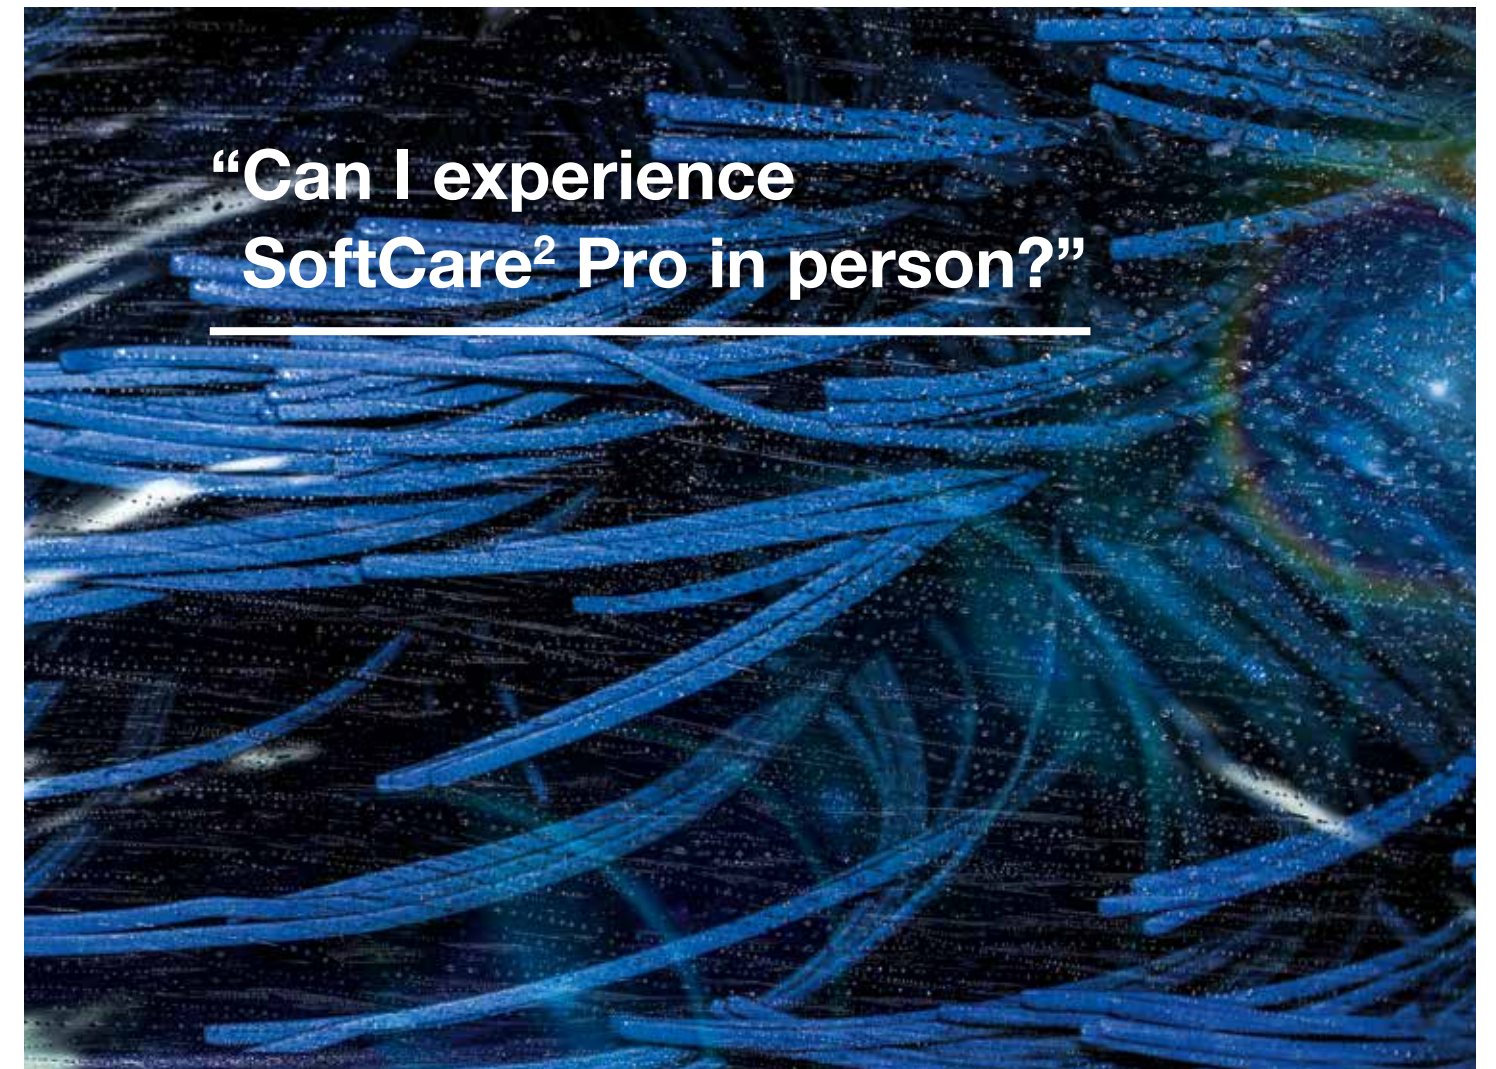

Online car wash management: WashTec Plus.

If you operate one or multiple systems on various sites the digital WashTec Plus management system gives you ultimate control over all of your systems at all times and from any location. Use your tablet, smartphone or computer to ensure that all systems are operating smoothly,

check turnovers or change the running time for washing programmes. It is super convenient from your office, home or while on the go. Thanks to WashTec Plus, you can avoid downtimes, correct problems immediately and optimise your business from a central point.

“Can I experience SoftCare² Pro in person?”

Visit our showroom in Augsburg.

Come to our new showroom in Augsburg, Bavaria, for your own personal experience of the state-of-the-art technology and design variants of the SoftCare² Pro and for all the information you need.
